# MOH 1200/USB

## MP3 Music On Hold Player

The MOH 1200/USB is a MP3 music on hold player which may be connected to the external music on hold port of any phone system to provide messages to callers put on hold. The MOH 1200/USB plays audio files recorded in MP3 file formats.

The MOH audio content is stored in standard USB flash drive from 256MB up to 32GB. The MOH 1200/USB is capable of playing back standard MP3 files as well as Variable Bit Rate MP3 files from 16Kbps to a full CD-quality audio playback sampling rate of 320 kbps. Fresh audio content is easily updated by inserting the USB flash drive into a computer's USB port and "dragging and dropping" MP3 files in to the flash drive.

The unit may also be used for overhead music / messages used in retail stores (store casting applications). The MOH 1200/USB comes with a royalty free generic on hold message and hence is ready to be used right out of the box for MOH applications.
