

VMS Lite

➤ **Enhance your voice communications with VMS LITE**

Even in this era of Email, Fax, SMS, MMS etc. there exists no alternative for voice communications. Only voice communications help you keep in touch with your customers easily and effectively. But in today's busy world, you can't always come to the phone... **VMS Lite** can.

VMS Lite is a full-featured voice mail system designed for the small to medium sized business that delivers the benefits of computer telephony at a phenomenal price to performance point.

VMS Lite can dramatically improve your call handling and lets you stay in touch with your customers whether you are making another phone call, in a meeting, or away from your desk.

VMS Lite is a stand-alone non-PC based Voice Mail System utilizing state-of-the-art Digital Signal Processors (DSP) and Flash Memories to store voice messages.

It can handle four incoming telephone calls simultaneously and can store up to 8 hours of voice messages. It has a complete Auto Attendant with Audiotex features and the built-in real time clock ensures automatic change over of day-night-break-holiday modes of operation. New voice message arrival notification via message waiting lamps on your telephone or via pager/mobile phone ensure that you are in touch with your customers 24 hours a day 7 days a week!

Synectix
Adding value to communications™
